Machine learning learning plan

Artificial Intelligence Primer Certification

Principles of Generative AI Certification

AWS Cloud Practitioner Essentials

Chandan Mahara

MCA Student @ Graphic Era Hill University | AI/ML | AWS Certified (ML Specialty & Cloud) | Python | C++ | Infosys Springboard intern
Dehradun, Uttarakhand, India

Summary

As a Master of Computer Applications student with a strong focus on Artificial Intelligence and Machine Learning, I am passionate about building intelligent solutions that solve real-world problems.

My hands-on experience includes developing AI-driven applications using Python, LangChain, and advanced LLM engineering principles. I am proficient in C++ and Python, with a solid foundation in Data Structures and Algorithms (100+ problems solved).

Key projects I've built:

****Intelligent Document QA System:**** An AI assistant that uses LangChain, FAISS, and Cohere to provide precise answers from large PDF documents.

****Algorithm Analytics Dashboard:**** An interactive dashboard to visualize and compare pathfinding algorithms (Dijkstra, A*, BFS, DFS, Bellman-Ford). Analyzes real-time performance based on execution time, cost, and nodes visited.

****PlantDocBot:**** A full-stack AI application for plant disease identification. Built with a Python/FastAPI backend to serve the machine learning model and an interactive React/Vite frontend.

I am certified by Amazon Web Services as an ****AWS Certified Machine learning – Specialty**** and ****AWS Certified Cloud Practitioner****, demonstrating my skills in cloud-based ML solutions. I also completed the Infosys Springboard virtual internship on Generative AI.

I am actively seeking internship and full-time opportunities where I can apply my skills in AI, cloud computing, and software development to contribute to innovative projects.

Let's connect!

Key Skills:

- AI/ML Engineering
- LLM Engineering (LangChain, FAISS)
- Programming: Python, C++, C
- Data Visualization & Dashboards
- Full-Stack Development (FastAPI, React)
- Cloud: AWS Certified (ML Specialty & Cloud)
- Databases: MySQL
- Tools: VS Code, Google Colab, Git

Experience

Infosys

AI Intern (Virtual Internship – Internship 6.0)

September 2025 - November 2025 (3 months)

Remote (Virtual)

- Completed an 8-week virtual internship under Infosys Internship 6.0 (B2) via Infosys Springboard.
- Worked on an AI-enabled plant disease diagnosis project using image and chat-based analysis.
- Applied machine learning and AI concepts to address real-world problem statements.
- Gained experience in virtual collaboration and structured AI project workflows.

Education

Graphic Era Hill University

Master of Computer Applications - MCA, Artificial intelligence and data science
· (2024)
